## MOBILE EMAIL SOLUTIONS AT A GLANCE

Windows mobile solutions provide a cost effective solution for delivering email, calendar appointments, contact information and tasks direct from your office network to your mobile device. Windows Mobile uses the same applications as your desktop computer enabling new users to be up and running instantly. Mobile Outlook enables you to send and receive emails with full HTML support enabling users to view messages the way the sender intended.

A new addition to the operating system is the Office Mobile suite (Word Mobile, Excel® Mobile and PowerPoint® Mobile) for Windows Mobile 6 Standard, helping users manage and review documents on any Windows Mobile 6 powered device.

The BlackBerry solution consists of smartphones integrated with software that enables access to email and other communication services.

**Smartphones**  
BlackBerry® smartphones provide unparalleled wireless access to email, phone and data services. Whatever your needs, there's a BlackBerry smartphone for you.

**Software**  
The BlackBerry® platform provides all of the software tools that you need to allow your mobile workforce to seamlessly access your email and enterprise applications and services. Whether a large enterprise wants to connect its mobile users with internal applications or a small business wants to access all of its email addresses from one smartphone – BlackBerry® software can make it happen.

BlackBerry® Enterprise Server – Software that integrates your organization's BlackBerry smartphones with your existing enterprise systems, securely extending wireless communications and corporate data to mobile users.  
BlackBerry® Internet Service – Allows you to integrate your BlackBerry smartphone with up to 10 email accounts, send and receive instant messages, and browse web content.

esemail is a fully featured hosted wireless email & PIM service for small and medium businesses who wish to enable mobile users quickly and easily.

The service lets mobile users send and receive email from Exchange, Domino, IMAP or POP3 mail servers – using virtually any device or wireless network. All the latest emails, calendar and PIM updates are automatically PUSHED to the mobile device, with little or no user intervention.

# MOBILE EMAIL AND DATA SOLUTIONS

The versatility of the service gives the widest choice of mobile devices allowing the user to select a device most suitable for his/her use.

Based on the award winning Nokia Intellisync Mobile Suite, esmail is the perfect solution to implement limited mobile data projects allowing the business to add users quickly to aid further deployment.
